ABOUT ME

I'm a software engineer who thrives on solving problems and learning fast. I enjoy turning complex ideas into clean, reliable code and understanding how systems work beneath the surface. From debugging tricky issues to picking up new tools and frameworks, I bring curiosity, persistence, and a strong growth mindset to everything I build. As an intern, I'm eager to contribute meaningfully, learn from experienced engineers, and continuously improve while creating software that actually makes an impact.

- PROFESSIONAL EXPERIENCE
- System Maintenance | 2024–2035

Science and Tech Co. – Remote

 - Performed regular system maintenance to ensure optimal performance, reliability, and uptime.
 - Assisted in backups, data recovery procedures, and system optimization tasks.
 - Collaborated with team members to improve system reliability and long-term maintainability.

- EDUCATION
- Midlands State University | 2024–Present

Bsc in Software Engineering
 - Pending

Chibi High School | 2018–2023

O Level – A Level
 - 10 O level passes including Maths and English

PROJECTS

Weather Application	Company Website
Python and Dart	HTML and CSS
